Simple, lightweight and easy to use retractable banner systems

add 1" bleed at top of image for all retractable banner stands

add 6" bleed at bottom of image for all retractable banner stands
please do not add any bleed on the sides

Digital File Specifications:

We recommend designing your banner at 50% of the actual banner size with an image resolution of 300 dots per inch (DPI) - this gives us 150 DPI at full size.

CMYK colour

Convert all fonts to outlines

Acceptable file types: EPS, PDF, TIF or JPG

Please keep any text, logos or important information away from the edges.

Easily send us your files via our online FTP system (<http://files.have1.com>)

Need Graphics Designed?

Contact us for pricing on having one of our designers create your banner graphics for you.

We can also help in making sizing adjustments to existing banner files or updating/changing info on your images.

Retractable Banner Setup Instructions:

All retractable banner stand systems are very easy to setup. (1) remove the base and the pole(s) from the carry bag. (2) assemble the pole into one unit (similar to a tent pole). Some units have telescopic adjustable height poles and these will need to be extended to your desired height and then twisted to tighten them. (3) insert the pole into the base of the banner. (4) it is usually easiest to tilt the base with pole on an angle to as you gently raise the banner from the base to the height of the pole. (5) attach the top of the banner to the top of the pole.

Prices do not include shipping, taxes, design / file setup fees. All prices and displays are subject to change without notice. While Supplies Last.
